

# Care and Maintenance: Corner Shelves

---

Corner shelves can add functionality and versatility to enhance your space and are available in tempered glass or various natural stones with unique characteristics.

## Maintenance Tips:

- Dust surfaces regularly to remove any gritty particles or debris as this can be abrasive to the glass or stone surface
- Sealing is strongly recommended for all natural stone products to prevent moisture absorption / damage – ensure the sealant is appropriate for the type of natural stone it's being applied to and the location the stone will be used in
- Periodically check the sealer to make sure it's working effectively and reapply as necessary as per the manufacturer's instructions
- Even sealed surfaces are susceptible to moisture penetration, especially from acidic liquids such as fruit juice, wine, vinegar, etc. so be sure to wipe up all spills immediately
- Dampen the surface of the stone with clear water to keep all cleaning solutions on the surface of the stone and use a damp micro-fiber cloth with a pH neutral stone cleaning solution, free of acid or bleach, to periodically wipe sealed stone tiles clean, polish dry to prevent dulling
- After using cleaning solutions, wipe the fixture down with a clean cloth and clear water to remove any residue that may have been left behind
- Use a damp cloth or sponge with an all-purpose household cleaner that is non-oil-based and has low VOC to clean glass corner shelves as needed
- A vinegar and water mixture can be used to clean glass shelves – this solution is NOT suitable for cleaning stone products

# Care and Maintenance: Corner Shelves

---

- Ensure the cleaning product selected is compatible with cleaning all present materials including grout, any decorative tile or accent materials - specially designed tile, stone & grout cleaners can be found at most stone and tile retailers
- Thoroughly read & follow all manufacture warnings and instructions for all cleaning products before use and test all cleaning solutions and materials in a small inconspicuous area before full application
- Do not use cleaning wax, oil based cleaners, ammonia, sealants or products containing acid or bleach as part of routine maintenance
- Avoid abrasive cleaning products such as scouring or steel wool pads
- Regularly inspect corner shelves and have any damage professionally repaired / replaced
